CLARKSVILLE .- A recent visit to this flourishing young city gave us an opportunity to observe some of the great improvements which are going on there, or have been made during the p at summer. We were pleased to notice the evidences of growth and prosperity which present themselves to the notice of the occasional visitor. The trade of Clarksvill , taking her size into account, is very considerabl , and, as a market for several important articles of produce, few towns in the State go beyoud her figures either in the quantity purchased or the price paid for it. Among the new public edifices we noticed the new building in which is located the Bank of America. It has a fine front of beauwhite marble, while the utile dules is otherwise to he seen in its plan and construction. In one thing however, she is equal'y if not more deficient than ourselves. We allude to a fine hotel building. While her botels are well kept, like our own, the structures themselves are ancient and dilapidated, without the improvements which, of later years, have been introduced into hotels throughout many s ctions of the country-improvements which add much to the comfort, satisfaction and conveniences

of guests and proprietors alike. There are many privat residences in the city of Clarksville which are bandsome ornaments to it. Ti e taste of her people in dwellings and the adornments of their grounds, is known far and wide, while the hospitality of her citizens is less proverbial. We had the satisfaction of meeting quite a number of personal friends while there of the counties of Montgomery and Robertson, and among them Col. M. D Davie, who will represent Mont" gomery in the coming session of the Legislature.

Clarksville is situated in a very fine and productive region of country, immediately upon the Cumland river, and possesses many advantages and ele FISHING SEINES ments which are conducive to great prosp rity and im ortance. May she increase and multiply in wealth, size and all the elements of greatness.

Luger beer, it is sa'd, will be used in much greater quantities this summer than last, Brewers are making extraor linary preparations for a busy season. The number of beer- hops has wonderfully increased and, consequently, the number of beer-frink-rs. Lager beer, almost unknown four years ago has gained a local habitation and name, and immense amounts of money are now expended for this drink .- N. Y. Mirror.

The Paterson Guardian says, quite an excitement has for the past formight existed in the upper part of that city, owing to a sort of Pearl mania. Some parties, a few weeks since, in examining the meat of the fresh water clams, which so abound in the brooks in that vicinity, discovered a pearl of uncommon size and beauty. Upon further searching others were secured, and the fact becoming known, quite a number of the townsmen got wild upon the discovery. About 800 have been found, one as big as a marble, for which \$200 has been refused.

Mrs. Phorie Webber, of Wayne county, Indiana, recently sent Mr. Buchanan a handsome p ir of mittens. Old Buck in return sent ber his likeness and \$25 in money. What was the old fellow up to?

Crooker's Millinery Establishment. We doubt whether the fair dames and belies o Nashville have ever experienced so much difficulty in the selection of a boonet, as this season, a this establishment. The cause is not to be found in the increased fastidiousness or captiousness of their tas es, nor in the paucity of the stock or inelegance of the styles. No; we must look for it in some other quarter. Their fancies, to tell the truth, have been bewildered by the great variety and beauty of the assortment to choose from. They experience | 18th, 1852 Done by order of the Board. such rensations while beholding it, as one feels in a rich conservatory surrounded by the rarest exotics, andlayed in their delicious perfumes. They have such emotions as led the poet to wish that the lips of all womankind, especially the beauties, were condensed into one pretty pouting pair that he T might, in kissing them, kiss the whole race. Where there is so mu h elegance, so great a variety, a choice must be difficult. The thing's natural; and the dear creatures are not to blame. But not of bonnets alone does Crooker's congress consist. Nearly all descriptions of millinery goods are represented there-from the lightest and most etherial to the heavier fatrics which art produces to adorn the
